

Paraben's Device Seizure

Data & Specifications Sheet

Comprehensive Mobile Forensic Solution

paraben[®]
corporation

Device Seizure set the standard in acquisition and analysis of mobile device data.

- Physical extractions for Android devices running up to v2.x, iPhones 3G, 3GS, 4G, 4G CDMA, iPad (Gen 1), and iPod Touch (up to Gen 4), CDMA phones with the Qualcomm chipset, & some Garmin GPS devices.
- Logical extractions for thousands of devices including all iOS devices, BlackBerries, Garmin & TomTom GPS devices, Android phones & tablets, & more.
- File system extractions for thousands of devices.
- Password bypass for hundreds of devices.
- Memory card and SIM data acquisitions including deleted data.
- Import backup files from computers for iTunes and BlackBerry IPD files.
- Advanced data parsers, data carvers, & data viewers for unmatched analysis.
- Built in file viewers and file sorter for easy analysis of acquired data.
- MD5 and SHA1 hash verification.
- Ability to read Cellebrite™ cases and reports.
- Advanced search options using Boolean, Unicode, and regular expressions.
- Comprehensive reporting.
- Advanced reporting including HTML timeline report.
- Case Comparer allows you to compare a device from one point in time to the next.
- Integrated Google Earth for viewing GPS data found on devices.
- Support for SIM cloning.
- Acquire multiple devices into one case.
- Export extracted data for review in other tools.

Over 10 Years of Mobile Forensic Experience

Paraben's Device Seizure was the first commercial forensic analysis tool for mobile devices. Trusted by law enforcement and forensic examiners, Device Seizure delivers physical, logical, and file system extractions for thousands of devices in one powerful tool.

Every License of Device Seizure Includes:

- Logical & Physical Extraction Support
- Hardware Cable Kit Including Faraday Bag
- Deployable Device Seizure (DDS) for Mobile Triage
- Link2 for Visual Link Analysis
- One Year Subscription Maintenance for Software & Hardware

You don't pay extra for physical extractions, triage solutions, or link analysis software.

Supported Devices

Device Seizure's support of a manufacturer goes down into the chip level on how the devices communicate, so logical and physical support are included with most manufactures. Below is a list of manufacturers and supported acquisition types. Please note that not all phones from a specific manufacturer will be supported.

Plugin Name	Supported Manufacturers	Type
Alcatel	Alcatel Devices	Logical
Android Logical	All Android OS Phones	Logical
BlackBerry Physical	RIM BlackBerry Devices	Physical
Garmin Logical	Garmin GPS Devices	Logical
Garmin Physical	Garmin eTrex HCX	Physical
iPhone Logical	iPod Touch & iPhones with OS 1.0, 1.1, 1.2, 2.0, 2.1, or Jailbroken iPhones	Logical
iPhone Advanced Logical	iPhones / iPads with OS through 3.x & iPod Touch	Logical
iPod Physical	All iPods except iPod Touch	Physical
Kyocera CDMA Logical	Kyocera CDMA Phones	Logical
Kyocera CDMA Physical	Kyocera CDMA Phones	Physical
LG GSM Logical	LG GSM Phones	Logical
LG CDMA Logical	LG CDMA Phones	Logical
LG CDMA Physical	LG CDMA Phones	Physical
Memory Card Physical	Any Media Card or Phone Storage that Mounts as a Drive	Physical
Motorola Logical	Motorola Phones	Logical
Motorola GSM Physical	Motorola GSM Phones	Physical
Motorola iDEN Logical	Motorola iDEN Phones	Logical
Motorola iDEN Physical	Motorola iDEN Phones	Physical
Nokia GSM Logical	Nokia GSM Phones not running Symbian	Logical
Nokia GSM Physical	Nokia GSM Phones not running Symbian	Physical
Nokia TDMA Logical	Nokia TDMA Phones	Logical
Palm Physical	Palm PDAs	Physical
Palm Pre Logical	Palm Pre Phones	Logical
Samsung GSM Logical	Samsung GSM Phones	Logical
Samsung CDMA Logical	Samsung CDMA Phones	Logical
Samsung GSM Physical	Samsung GSM Phones	Physical
Samsung CDMA Physical	Samsung CDMA Phones	Physical
Sanyo CDMA Logical	Sanyo CDMA Phones	Logical
Sanyo CDMA Physical	Sanyo CDMA Phones	Physical
Siemens Logical	Siemens Phones	Logical
Siemens Physical	Siemens Phones	Physical
SIM Card Logical	GSM SIM Cards	Logical
Sony Ericsson Logical	Sony Ericsson Phones	Logical
Symbian OS 6.0, 6.1, 7.x - 8.x, 9.x Logical	Symbian Devices running OS 6.0, 6.1, 7.x - 8.x, 9.x	Logical
Symbian Physical	Symbian Devices	Physical
Symbian Psion 16/32-bit Logical	Psion PDAs running Symbian 16/32-bit OS	Logical
TomTom Logical	TomTom GPS Devices	Logical
Windows CE, Mobile, Pocket PC Logical	Devices running Windows CE, Mobile, Pocket PC through 4.x	Logical
Windows Mobile 5.x - 6.x Physical	Devices running Windows Mobile 5.x - 6.x	Physical
ZTE Logical	ZTE Devices	Logical

Customize Your Solution

Unmatched Prices

Device Seizure starts at \$1,795. Most tools that offer logical and physical extractions for more than just some smart phones can cost 7 times more than Device Seizure. The cost of maintenance is also very affordable. For \$360 per year, you get all new releases, new hardware updates, and unlimited support. You could buy a license of Device Seizure plus another mobile forensic tool just for the price of annual maintenance of other tools.

Device Seizure 6.0

Purchase a license of Device Seizure and you'll get a licensing dongle, cable kit, license of DDS, Link2, & one year of subscription maintenance. This is perfect for use in a lab.

Mobile Field Kit 2.0

(Standard Slate Computer Shown)

The Mobile Field Kit is a portable solution that includes a rugged carrying case, cable kit & faraday bag, Project-A-Phone ICD-8000, car charger, & Device Seizure, DDS, & Link2 embedded in a laptop, slate tablet, or rugged slate tablet. This portable mobile forensic lab is perfect for use in the field.

DS Box 1.0

The DS Box is a kiosk system designed for quick data triage analysis of phones in a controlled environment. The kiosk includes a touch screen, standard cables and card readers, and a version of DDS designed for fast, logical extractions and analysis of mobile device data with little to no training needed. This option is popular in prisons and state crime labs.

Ultimate Forensic Bundle

Whether you need to examine mobile devices or computers, Paraben's Ultimate Forensic Bundle gives you the software and hardware you need to complete 360° of digital forensics. By combining Device Seizure with Project-A-Phone Flex, you can examine and report on any handheld device on the market with either a logical or physical acquisition or through a photo examination. Hard drive and related media can be acquired, examined, and reported on using the P2 Commander products.
