

Smartphone instructions for Pantech PN-820

Enabling Bluetooth on UME36:

1. From the main menu, select “Services” => “Admin Settings” and enter password “ADMIN333” and choose F3 to confirm.
2. Choose “Connectivity” => “Bluetooth Support”, and check “Use Bluetooth Dongle”. Select right arrow to save settings. (Please note Bluetooth supported in Application versions 1.0.3.4 ST and higher)
3. Insert Bluetooth Dongle in “USB Ext.” port on top of the UME36.

Enabling Bluetooth on the PN-820:¹

1. On the main menu of the phone, open “Start” => “Settings”
2. Open the “Connections”, then “Bluetooth”
3. Select “Discoverable”, then select “Done”
4. Set PN-820’s Bluetooth name by opening “Start” => “Settings” => “Bluetooth Name”
5. Set name, then select “Done”
6. Select “Start” => “Settings” => “Connections” => “Beam”
7. Check “Receive incoming beams” box, then select “Done”.

Transferring Phonebook to the PN-820:

1. Select Source and Target phone as normal. Target will be “Pantech” => “Pantech PN-820”
2. Start the transfer, select the “>” arrow on UME36 when prompted to upload the Client. Choose “>” arrow again when prompted to activate Bluetooth.
3. UME36 will detect all Bluetooth devices within range. Select Pantech pn-820 in the menu and click OK.
4. PN-820 will prompt to pair with UME36, click “Yes” on PN-820 and enter pin code “0000” and click next. **VERY IMPORTANT:** Make sure the PN-820 displays “Info: Your Smartphone has connected with UME36”²
5. Finish adding the UME36 as a Bluetooth device by accepting all prompts on the PN-820.
6. Click “>” arrow on UME36 when prompted to finish adding the UME as a new Bluetooth device.
7. UME36 will upload client, click “yes” on PN-820 when prompted to accept.
8. To install the client from the main menu of the PN-820, select “Start” => “File Explorer” and open the “celebrite.exe” program from “My Documents” folder. Select “yes” to confirm unknown publisher.
9. Select “>” arrow twice on the UME36 to finish transferring the phonebook.

¹ Press F1 on the UME for help instructions if needed.

² Pairing and adding the UME36 device to PN-820 Bluetooth devices is very important. If you do not see the prompt in step #4 above, try again.
