

T35es eSATA Forensic Bridge

T35es eSATA Forensic Bridge

The Tableau T35es eSATA Forensic Bridge supports four different host connection options for SATA and IDE device acquisitions:

- One eSATA
- Two FireWire800
- One FireWire400
- One USB 2.0/1.1

The T35es: Superb write-blocking performance in a compact, rugged, and easy-to-use package.

The Tableau T35es - Meeting The Need For eSATA Host Connectivity

With four different host interface options, the Tableau T35es eSATA Forensic Bridge establishes a new standard in write-blocker performance and host interface connectivity. The T35es offers unmatched product quality, host interface flexibility, reliability, ease of use, and overall imaging performance.

Convenient, Fast SATA & IDE Drive Acquisitions

The T35es eSATA Forensic Bridge natively supports write-blocked acquisition of SATA and IDE drives without the clutter of special cables or adapters. As with all Tableau forensic bridges, the T35es recognizes and defeats HPA (Host Protected Area) or DCO (Device Configuration Overlay) regions. Plug in, power up, and start acquiring evidence.

Performance Matched Imaging Software

Imaging software can have an enormous impact on imaging performance. Guidance Software recommends the use of EnCase Imager or Tableau IMager (TIM) for optimum imaging speeds. Both imaging applications use "best in class" multi-threaded technology to deliver unprecedented performance. Regardless of whether your imaging needs require .e01 (compressed) or raw/DD output formats, EnCase Imager and TIM deliver unmatched performance, features, and ease of use.

Tableau Disk Monitor (TDM) Application Creates Unmatched Value

The TDM software application automates the collection of key device and subject drive data required for forensic case reports. Tableau developed TDM for use with the T9 and all other Tableau write blockers. Download your free copy of TDM at www.tableau.com/software.

Protect Your Investment With Tableau's Firmware Update Utility

When you purchase a Tableau forensic bridge, you can rely on our firmware updates to deliver high-quality, high-performance, and robust device capability for many years to come. The Tableau Firmware Update (TFU) utility offers users a fast, convenient method to maintain the T35es and all of our forensic bridge products.
